Oil Spill Response

The Teignmouth Harbour Commissioners, in line with environmental protection duties and the Port Marine Safety Code, has an oil spill contingency plan outlining our response to an oil pollution incident within harbour limits.

The Commissioners' Oil Spill Contingency Plan is regularly reviewed and used in exercises to ensure it is relevant and fit for purpose. We work regularly with ABP as a Harbour Authority and external agencies to conduct practical exercises to test the Port's contingency plans.

Our staff are trained to MCA standards in Oil Spill response, to ensure we can react promptly and effectively to a spill of any size.
